OVERVIEW

A passionate and results-oriented full-stack developer with four years of experience in Python, JavaScript, and React, specializing in building scalable web applications. I have worked across various industries, including fintech and engineering, delivering efficient software solutions to improve business processes. Skilled in both frontend and backend technologies, I have a proven ability to collaborate with cross-functional teams to drive project success.

EXPERIENCE

OM Engineering   01/2021 - 07/2024   *MERN-Stack Developer*

- Designed, developed, and maintained full-stack applications using the MERN stack (MongoDB, Express.js, React, Node.js)..
- Collaborated closely with teams to ensure timely delivery of high-quality software solutions for clients.
- Led code reviews and implemented testing procedures to ensure code quality and efficiency
- Developed and deployed secure REST APIs, enhancing system performance and scalability

KisPay Payment   07/2024 - - Present   Full-Stack Developer

- Developed fintech applications with a focus on secure payment processing and transaction system
- Integrated third-party APIs and services, improving the functionality and user experience of web platforms.

- Utilized Python and React to create responsive web interfaces and backend systems.
- Collaborated with the DevOps team to streamline deployments and maintain CI/CD pipelines.

EDUCATION   **Unity University**

2019 - 2023   Bachelor's Degree in Computer Science

- Developed strong foundational knowledge in computer science, with a focus on software development, data structures, and algorithms.

PROJECTS

Restaurant Management System

- Developed a full-stack restaurant management web app where customers can scan a QR code to view menus and place orders.
- Built a real-time dashboard for waiters to monitor and manage orders.
- Deployed using React, Node.js, and MongoDB.
- You can get by this link :-
  https://github.com/natib21/restaurant-BO

Dashboard Applications
- Created several dashboards for internal and client-side use, focusing on real-time data monitoring and analytics.
- Tools: React, Chart.js, and Node.js.
- You can get by this link :- https://github.com/natib21/the-wild-oasis

React Native Projects

- Developed mobile apps using React Native for both Android and iOS platforms.
- Key features include geo-location tracking and API integration for real-time services.
- You can get by this link :- https://github.com/natib21/React-Native-simple-restaurant-app

SKILLS

Prisma / JavaScript / React / Node.js / MongoDB / MySQL / Next /Express / Git / Docker / REST APIs / Agile Development
